Transparent Weighted Scoring Methodology & 6-Criteria Audit

Rigorous evaluation across 6 commercial dimensions with dynamic re-normalization for unquoted criteria.

HOW DYNAMIC WEIGHT RE-NORMALIZATION WORKS:

When qualitative dimensions (such as verified portfolio evidence or client references) cannot be substantiated from the uploaded quotation text, Gathbandhan marks them as 'Unavailable - excluded from scoring' rather than penalizing vendors with a zero score. The scoring engine deterministically re-normalizes the remaining active criteria weights to equal 100%, preserving mathematical equity.
